Leveled Land Information

- Before installation, it is extremely important that the customer's site is properly and professionally leveled.
- At Ark Custom Builders, we strive to provide a smooth and efficient installation process; however, our installation crews will not be able to proceed if the construction site is not properly prepared.

Please ensure your customer understands that the following site conditions may delay or prevent installation

1

Wall installation - 3 feet max.

2

No install on stacked blocks.

3

No install on floating docks.

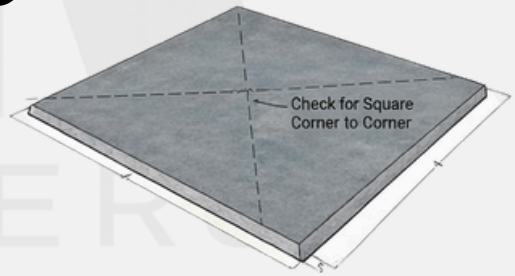
4

No install on slopes over 12".

5

No install on unlevel land.

6



Slab must be level and square.

We appreciate your cooperation in helping us provide a safe, efficient, and successful building experience for every customer.
